TESCOM Ultra High Purity Compact Panel is a VCR® compatible central gas supply unit for pressure control of high grade analytical gases in laboratory facilities. Depending on the requirements, these units switch over to a spare cylinder in order to enable an uninterrupted gas supply. The use of contact gauges allows the monitoring of empty gas cylinders, in combination with an annunciator.

Application

- Central gas supply for the distribution of gases in laboratory applications

Advantages

- VCR® technology for high purity application
- Automatic changeover for continuous gas supply
- Integrated purge and shut-off valve for fast purging
- Optional Hastelloy® trim and positive seal for corrosive media
- Field-proven TESCOM 64 Series regulator design
